

IVÁN THANON MORENO

Backend Software Engineer

📍 Canary Islands, Spain ✉ ivanthanonmoreno@gmail.com ☎ (+34) 639-77-27-81 in 

Software Crafter with 3+ years of experience, a strong focus on Backend Development, and a solid software engineering foundation. My approach bridges technical excellence with product vision to deliver robust, scalable systems while accelerating time-to-market. Passionate about XP, software design, testing, driving team growth, and building useful products.

SKILLS

- Languages: C#, Java, Javascript, Typescript
- Architecture & Practices: Test Driven Development (TDD), Domain-Driven Design (DDD), Hexagonal Architecture, SOLID, Design Patterns, Event Driven Architecture, CQRS, CI/CD, Trunk-Based Development, Extreme Programming (XP), Lean Software Development, Scrum, Agile.
- Frameworks: .NET, Spring Boot, NestJS.
- DevOps & Tools: Azure DevOps, Github Actions, Jenkins, Grafana, Docker, Powershell, SQLServer, Entity Framework Core, MySQL, PostgreSQL, Kubernetes, ArgoCD, Git, GitHub Copilot.

PROFESSIONAL EXPERIENCE

Backend Software Engineer | AIDA, Domingo Alonso Group

October 2023 – Present

- Developed product-oriented solutions for the automotive industry, focusing on warranties and campaigns for clients such as Volkswagen, Hyundai, Toyota, Renault and Citroën, managing an annual business value of €500k.
- Enhanced CI/CD pipelines, cutting execution times by 40% when handling transient errors.
- Actively participated in the company's testing strategy within a Hexagonal Architecture, covering E2E, integration, contract, unit, and smoke testing.
- Contributed, as part of a 7-person team, to implementing a CI/CD workflow using Feature Flags and Parallel Change.
- Implemented full-stack observability across artifacts using the LGTM stack (Loki, Grafana, Tempo, Mimir), lowering the Mean Time To Resolution (MTTR) and preventing critical production downtime.
- Translated key engineering initiatives for the team, such as implementing system resilience practices and preparing software artifacts for Kubernetes environments with ArgoCD.
- Delivered technical training and provided mentorship to junior profiles to ensure a smooth onboarding process.
- Adopted AI tools to amplify productivity, leveraging GitHub Copilot and MCPs (Model Context Protocol).
- Led discovery meetings with end-users to deeply understand their needs and align them with product development.

EDUCATION

Associate's Degree in Web Application Development, Software Engineering

IES El Rincón | Graduated May 2025

- **Relevant Coursework:** Java, Python, PHP, Laravel, Spring Boot, HTML5, CSS3, Javascript, Typescript, React, Linux.
